

EXTRAORDINARY AMERICA PLATFORM

Introduction

On the Financial Front Extraordinary America is about the abolition of financial slavery! It is about the financial freedom of the 99%. It is about the Nation of Immigrants and descendants of Immigrants awakening and unleashing the Extraordinary within themselves and setting themselves free!

On the Societal front America is a nation Divided and has taken on the traits of a narcissistic family dynamic with Republicans and Democrats being the toxic father and mother, and conservatives and liberals being the respective golden and scapegoat children. Extraordinary America is about separating the INDEPENDENTS aka the forgotten children of America from such a Toxic Family Dynamic by first freeing them financially and then Uniting them under the Ideology of Neo-Humanism, which calls for loving all beings as they would love themselves regardless of race, caste, creed, gender, ethnicity and religion. Only through the antidote of empathy and seeing each other through the lens of a normal functioning family can we defeat the PLAGUE of narcissism!

On the Spiritual Front the forces of darkness are spreading throughout America from both the Right and the Left. The law of one understands there is only ONE creator from which the entire universe came out of and that we are all the manifestations of that one creator....that the one became the many...and the many will become the one. We must become One with the Father aka the Source of all Creation. This can be achieved through the process of Self-Realization through "Union Based" Meditation and service to humanity. The law of one aka the lightside embraces love, compassion, peace, oneness, calmness, tranquility and everything that creates Unity, Order and harmony whereas the law of ego aka the darkside embraces egotism, arrogance, anger, hatred, greed and everything that creates disunity, chaos and disharmony. Only by Implementing the Law of One not just on an individual level but also on a national level can we bring the light back to our Nation. Extraordinary America is about us, choosing the Law of One over the Law of Ego.

Financial Front

America has always been about freedom, opportunity for a better life and the pursuit of happiness. For over 400 years since the days when the Mayflower ship landed upon the shores of America, Immigrants have come to this land of promise, seeking Liberation and starting a new life! But unfortunately in the present day most Americans have become Enslaved Financially. Most Americans are not free when it comes to the financial front. They are under financial slavery due to losing their jobs, living paycheck to paycheck and having stagnant wages. They are burdened with inflation and debt of all kinds. Wealth and income inequality runs rampant across America while the middle class has all but disappeared! Where there is no freedom there can never be opportunity nor happiness. Such a disconnect between who we are as Americans and our financial reality cannot be allowed to continue. Therefore *Extraordinary America is about the Abolition of Financial Slavery. It is about the Financial Freedom of the 99%! It is about the Nation of Immigrants and descendants of Immigrants awakening and unleashing the Extraordinary within themselves and setting themselves free!*

There are 3 major issues confronting Americans on the financial front today.

1. Wealth and income inequality between the 1% and the 99%

The first problem is that there is a great level of wealth and income inequality between the 1% and 99%. Back in 2020 the coronavirus pandemic had created a massive loss of jobs, where at least 40 million people lost their incomes. Even though the government managed to offset that crisis temporarily through lots of money printing and low interest rates, another job crisis of epic proportions is right now around the horizon. With the current Federal interest rates being where they are, along with Automation and AI, we are looking at a massive recession soon where many companies will go bankrupt and there will be mass layoffs. Of those people that do have jobs now, many of them are just living from one paycheck to another, trading their time for money. They're going through these dead-end jobs that they don't really like, sometimes two to three of them just to make ends meet. They're doing this because they've got to pay their bills and pay off their debts. This is creating a lot of stress and anxiety and most don't have hope for the future. Moreover, many are working in a narcissistic work culture in corporate America and blue-collar America where they have these bosses and corporate heads who have no compassion for them. They're just cogs in the wheel and there's utter apathy and indifference for them. They're

underpaid, overworked and essentially replaceable because of abundance of labor, which is caused by outsourcing which in turn is caused due to globalization.

2. Loss of Purchasing power, Stagflation and Debt

The second problem is the reduction of our Currency's purchasing power and overall wealth, over a period of time. At this point we are at the precipice of a massive devaluation of the US dollar due to massive money printing by the government and banks. Our overall purchasing power and overall wealth has been reduced due to stagflation, which is stagnant wages over a period of time, combined with inflation of prices aka rise in the cost of living. Globalization has caused the outsourcing of many jobs where we now have an abundance of cheap labor for corporations from third world countries. So companies can afford to pay a lower income to most people and make them work longer hours as well as overwork them, because they know that most of us are replaceable. Compounding this problem is us as a nation and individuals taking on debt. In order to keep and maintain our lifestyle over a period of time (paying for mortgage, car, electricity etc) in the face of stagflation, we take on debt. Since debt is a "spend now pay later" way of life, It's really enticing and looks very appealing. It's easy money but once you start getting into debt, that's when you realize that at some point you have to pay off those student loans, mortgages and credit cards, and that too with Interest! that's when you're forced to work, even if you don't want to, just to pay it all off. So when you combine stagflation and debt together, we see why the middle class has been disappearing.

3. Future Recession followed by Big inflation or hyperinflation of the US Dollar

The third problem is that right now with the current federal interest rates, we are on a metaphorical cliff looking down into a recession. If that happens it will be followed by another massive inflation if not hyperinflation, where the U.S. dollar will be devalued in a massive way and our purchasing power and all your savings will be gone. There will be a massive rise in prices and cost of living. You see, the problems created from the 2008 crisis as well as the 2020 pandemic has not really been solved, It has just been postponed. What they did to solve the 2008 banking crisis and the 2020 pandemic crisis was they printed massive amounts of fiat money, which is backed by nothing. And then they put it into the stock market, real estate, bonds, etc.

which created a massive everything bubble. They also had zero interest rates on top of that for the longest time. But now due to the relatively high interest rates, at some point there will be a popping of all these bubbles (real estate, stocks, bonds). And when that happens many businesses will close and a lot of people are going to lose their jobs as a result. And what's going to happen is that in response to that, the banks and the government are going to print a lot of money, which they did for 2008 and again in 2020, and they're going to lower interest rates again. Which will eventually result in big inflation if not hyperinflation. Our savings will be destroyed because the same \$100 or \$1,000 that you have, that could purchase a certain amount of goods in the grocery store or anywhere else will now be able to purchase even less because of all that extra currency! Because whenever currency is created, it is devaluing every individual dollar that's out there.

In the short term we solve these problems on a personal level by Investing in non-dollar denominated assets such as precious metals and the right cryptocurrencies, to protect your purchasing power from Inflation.

In the long term we solve it by the 3-step solution.

- 1. The first step is the transformation of the 99% into entrepreneurs and Investors on the light side aka with ethics, with the goal of financial freedom for all! This is to be done through financial Literacy and education with regards to Money, precious metals, real estate, Starting a business as well as entrepreneurship and investing, for this is the path to financial independence.***

Financial Literacy and Education is one of the pillars of an Economic ideology known as Ethonomics. Ethonomics is a new economic structure, defined by A foundation in science, mathematics, and ethics. It is about Success in both the short and long term as well as a mindset of focus on abundance and prosperity over survival and scarcity. The United States economy was formed after an 18th century Scottish philosopher, Adam Smith, published the book, "The Wealth of Nations" in 1776. In his book, Smith popularized many of the ideas that formed the basis for our current system. Years later other economists built on Smith's work to solidify classical economic theory, which became the foundation for the economic structure through the Great Depression, a time when scarcity thinking was in abundance. The objective was to create what would be deemed as a mixed

economy; An economic system that would feature the character of both capitalism and socialism. The belief was that a mixed economic system could protect some private property and allow a level of economic freedom in the use of capital, but also allow for governments to intervene in economic activities in order to achieve social aims on behalf of public good. By studying the evidence and historical data over many decades, we can now definitively conclude the following: Firstly, those who have created significant wealth, did so by operating outside of the foundational principles set out by Smith and our current economic structure. Secondly, that the study of scarcity will never - and can never lead to a greater wealth position. This is true for the same reason that it is impossible to attain optimal health by exclusively focusing on disease and surrounding oneself with the sick. Things are not brought into existence by focusing on their opposites. Today, Adam Smith is still considered the father of modern economics, and his system continues to operate and spread throughout the globe. This structure is a complex network of interactions that governs the production, distribution, and consumption of resources. While it has undoubtedly brought about some advancements and improvements in several aspects of society, it is not without significant flaws, namely that it perpetuates poverty and oppression.

As mentioned one of the foundational pillars of Ethonomics involves the transformation of the 99% into Entrepreneurs and Investors with Ethics through Financial Literacy and Education, for that is the only way Financial Freedom can be attained on a permanent sustainable level in our lives. The best we can do as individuals is educate ourselves and make the most of ourselves. Only through Knowledge can we defeat ignorance and gain greater mobility in our lives...only then can we end Financial Slavery. When we talk about knowledge we are talking about Entrepreneurship, Starting a Business, Money, Precious metals, real-estate, how the financial and banking system work and finally the knowledge to counter stagflation and debt. Only when we free ourselves can we free our family, our friends and then if possible our community! If we do our part as Americans and hold to the ideals of freedom, then we will have no choice but to take action on the financial front and abolish slavery from our lives!

- 2. The second step is the creation of Spirituo-economic institutions led by jedipreneurs who serve humanity for the one Father of the Universe. they are spiritual minded entrepreneurs who combine the principles of the law of one and Neo Humanism with ethonomics. The institution consists of 3 structures namely a Temple, Academy and Corporation. These institutions will provide free or subsidized essentials of life such as food, clothes, housing, healthcare and education as well as provide the necessary financial support and education for the people in their jurisdiction to become financially free. This is because all the people in this universe are the sons and daughters of the ONE father of the universe. This father is a benevolent 1% Father and everyone irrespective of their caste, creed, religion, gender, ethnicity are part of his family.*

Jedipreneurs serve humanity for the sake of the ONE father. And they see the father in all of creation and have the goal of eradicating poverty for his sake. They're tolerant of all faiths and they believe in combining the law of one and Neo Humanistic Ideologies with ethonomics when it comes to uplifting humanity. They see the father of the Universe as a 1% father and all beings as part of his family. If you look at a 1% family where either the father or both the parents are entrepreneurs...you see that from a small age, they teach the children thoughts and actions that set them up for financial success. The 1% fathers and mothers do it because they love their children and want to make sure that their children are bred for financial freedom. They always get a leg up with regards to financial knowledge and support. So now if you take the same concept and you put it towards all of humanity globally and even on a national level as well, you realize that we are all children of one universal Father of the universe who is the ultimate one percenter on the light side. He created all the fathers and mothers in all the galaxies of the universe, including the one percenters. Essentially what that means is that we are all children of a one percenter family. Jedipreneurs are merely the instruments of the Divine Father's will to Financially Free his children and at the very least give them a higher standard of living. They are like the older brothers and sisters of the ONE father's Family and they strive to look out for the family's well-being

financially, mentally, emotionally and spiritually. The jedipreneur institutions will consist of a temple where people can worship the ONE Father and commune with the source of all beings and of creation. They will have an academy where people will be given financial as well as spiritual knowledge and their application towards financial and spiritual freedom. Finally the institution will have a corporation/business through which jedipreneurs will financially liberate those under their jurisdiction as well as provide the 5 essentials such as food, clothing, housing, healthcare and education. The people in their jurisdiction will be treated the same way children of 1% family are. This type of system has been practiced in Some Middle east countries such as Kuwait, where the Nation has a corporation which makes money from oil, and distributes the proceeds that they get from it towards free or subsidized housing, healthcare, education and food for its citizens. Instead of oil money Jedipreneurs will use multiple streams of income from different sources to achieve the same goal. Extraordinary America Strives to create a Jedipreneur Institution of its own in order to serve as a prototype and inspire others to do the same not just for our nation but for nations across the world!

3. The third step is the replacement of the current debt based fiat monetary system with the American Dream standard aka the Uplifted Human standard.

For thousands of years gold and silver were considered money by the entire world and they were a store of value. However what is considered valuable by society is not considered valuable by the One father of the Universe. He considers the upliftment of his sons and daughters as the ultimate store of value, and that should be the foundation of our monetary system. What that means is just as gold coins were attained after mining them and refining them out of gold mines, we should have “American Dream Coins” or “Humanity Upliftment” Coins to which our national currency is pegged. These coins can only be created after we have verifiably uplifted a human being for a certain amount of time. If this happens humanity will uplift and

serve their fellow human beings the way the ONE Father wants them to, with the same zeal and enthusiasm as the gold rush of 1849.

To Understand this better we must first understand the difference between Quantity money and Quality money. Quantity money is basically Money that is backed by nothing scarce or tangible and can be printed in large amounts at will by just using a printing press. This has throughout history always led to the currency being destroyed through hyperinflation.

Quality money is money backed by something tangible and scarce usually by a commodity metal such as gold and silver. This helps retain the purchasing power of your money over long periods of time due to its relative scarcity, which makes it valuable. Until 1971 we were under a gold standard, which means that our monetary system was backed by gold.

Quality money backed by gold is all well and good. However, this won't help eradicate poverty and give humanity a higher standard of living. It will just lead to the transfer of wealth from one group to another. This doesn't solve the problem of wealth and income inequality.

We propose neither the fiat standard nor the gold standard. What we propose instead is the American Dream Standard aka the Uplifted human standard. You see money is nothing but a collectively accepted idea by society. It is a Unit of account for perceived value, medium of exchange for perceived value and a store of perceived value. The reason we used gold as money was because we **collectively perceived** it as valuable. We accept fiat money because everybody **collectively perceives** it and accepts it as value. **What we value collectively becomes money.**

But what if we turn our perception towards ourselves instead? What we realize is that what gives value to anything is us human beings. Rather than learn alchemy to transform base metal into gold, as many have tried in the past centuries, we simply understand that *We are the gold, We are the money, Our Upliftment is the gold, Our upliftment is the money!* We turn our attention collectively from external objects like gold to ourselves and our upliftment instead. And when it comes to the One father, we see that whenever he sent his prophets, he did so to uplift humanity rather than for gold and silver. To him uplifted human beings was the value, uplifted human beings was the gold, uplifted human beings was the money. Therefore, what we propose instead of the gold, or the fiat standard is the Uplifted human standard aka the American Dream Standard for there is nothing scarcer and more valuable in this universe, than an uplifted human being. Instead of

money being created in large amounts out of the printing press like with Fiat money, or money being created out of gold mines by mining and refining gold from gold ore, money shall be created when human beings are uplifted instead...money shall be created when human beings are verifiably given food, clothes, shelter, healthcare, education, their freedom and civil rights. Money shall be created when human beings are Socio-economically uplifted and financially liberated. Why? Because human beings and corporations are motivated by self-interest..and money is the supreme symbol of self-interest...when we collectively accept human upliftment as money, they will then go ahead and do so...for they are now incentivized. Poverty shall finally be finished...

Societal Front

On the Societal front America is a nation Divided and has taken on the traits of a narcissistic family dynamic with Republicans and Democrats being the toxic father and mother, and conservatives and liberals being the respective golden and scapegoat children. Extraordinary America is about seperating the INDEPENDENTS aka the forgotten children of America from such a Toxic Family Dynamic by first freeing them financially and then Uniting them under the Ideology of Neo-Humanism, which calls for loving all beings as they would love themselves regardless of race, caste, creed, gender, ethnicity and religion. Only through the antidote of empathy and seeing each other through the lens of a normal loving family can we defeat the PLAGUE of narcissism!

First of all let us understand what narcissism is. It is a way of thinking and acting where one thinks very highly of oneself and need excessive praise and admiration from others. They believe they are special and that people are inferior to them while lacking empathy for them. They operate out of the lens of egotism, arrogance and need for control. A narcissistic individual uses destructive criticism and bullying to achieve their goals as well as Manipulates, lies, blames and gaslights their way through life. When it comes to a Narcissistic Family there are 5 Major roles that come into play namely

1. Narcissistic Patriach/Matriarch

The Narcissist head of the Family who runs the family like a dictatorship. He/she has the goal of presenting a false happy success image of the family

to others while simultaneously manipulating, blaming, lying and gaslighting their way to glory at the expense of the other family members. They see the family as an extension of themselves.

2. Enabling codependent spouse

This is the husband/Wife of the Narcissist who enables their bad behaviors and tries to please and appease them in order to get their approval and validation

3. Golden child

the apple of the Narcissist's eye. The narcissistic parent uses the child for narcissistic supply and projects positive characteristics onto him/her, seeing only perfection in this person. They are usually good at something that the narcissistic parent values and hence get treated better than all the other siblings. The golden child loses his/her identity in the process and also enables the bad behavior of the parent

4. Scapegoat child

The Scum of the Narcissist's eye. He/she cannot do anything right in the eyes of the parent and ends up bearing all the anger, shame and humiliations of the narcissist parent. This child gets treated very badly and gets blamed for everything that goes wrong with the family.

5. Forgotten/Lost Child

Invisible and forgotten to the Narcissist. It doesn't matter if they are doing well or not, if they are succeeding or failing, if they are engaged in positive or negative behaviors at home...they are simply forgotten...overlooked...unloved. No one cares about their problems or how they feel or experience the world. They are simply irrelevant and unimportant.

America is Currently a Nation Divided... Right Vs left, Red Vs Blue, Republicans Vs Democrats, Conservatives vs Liberals, Patriarchy vs Matriarchy. America has become a BROKEN Narcissistic Family with a narcissistic "Republican" Father and "Democrat" Mother constantly fighting alongside their respective golden child and Scapegoat children (Conservatives and liberals). The people that are left out are the INDEPENDENTS caught in the middle aka the Forgotten children of America. Anybody that has been in a narcissistic family knows that when parents of that nature fight like that, it is usually a LOST CAUSE. You cannot make the horse drink water if it doesn't want to. What you can do though is Separate yourself Financially, emotionally, mentally and physically from the toxic dynamic of such a family, quit wanting the approval and love of such toxic parents when it

is not forthcoming and start loving yourself and becoming the best version of yourself. Then you spread that out to others through the ripple effect. That's how true change occurs and the same is true on a national level. Extraordinary America is about guiding the Forgotten children and awakening the Extraordinary that is already within them through the practice of Neo Humanism.

Neo Humanism is a philosophy, practice and way of life where the person has love for all created beings of the universe as they would in a normal healthy loving family. Everyone is inherently interconnected and have intrinsic and existential value so they must be given a basic level of **respect and dignity**. We as Americans must implement Neo Humanism in our own individual lives and love all beings as we would love ourselves regardless of race, caste, creed, gender, ethnicity and religion. Only then can we as individuals and as a nation push back against the hate, division and anger that comes from a Narcissistic family dynamic that is happening right now on a national scale!

Spiritual Front

On the Spiritual Front the forces of darkness are spreading throughout America from both the Right and the Left. Extraordinary America is about us choosing the Law of One over the Law of Ego. The Law of One understands that there is only ONE creator from which the entire universe came out from, and that we are all the manifestations of that one creator.... that the one became the many...and the many shall become the one. We must become One with the Father aka the Source of all Creation. This can be achieved by attaining Self-Realization through the practical process of "Union Based" Meditation and service to humanity. The Law of One aka the lightside embraces love, compassion, peace, oneness, calmness, tranquility and everything that creates Unity, Order and harmony whereas the law of ego aka the darkside embraces egotism, arrogance, anger, hatred, greed and everything that creates disunity, chaos and disharmony. Only by Implementing the Law of One not just on an individual level but also on a national level can we bring the light back to our Nation.

As we know, part of being American is the Pursuit of Happiness. The American dream is the vision that most Americans have when it comes to understanding what it means to be happy. In today's world this is attempted through materialism. People strive to acquire material things hoping that it will make them happy, but

unfortunately everything in this world is temporary and limited, therefore the happiness that can be attained from them is also temporary and limited. Infinite Unlimited happiness cannot be attained through temporary and impermanent worldly pleasures whether it be houses, cars, wealth, status, power, women etc. At death we must leave them all behind anyways! It can only be achieved with the ONE creator or consciousness that is the source of ALL creation, for that entity alone can provide you with unlimited infinite permanent happiness. Only with becoming one with the father can we achieve a state of being that is eternal beyond death. We must have a balance between the material world and the spiritual world. Materialism should be in moderation and should not be the end in itself because overindulgence and hoarding will not satisfy us.

Right now, we all understand that Matter is condensed Energy. But in the future everyone will know that Energy is condensed thought form and that thought form is nothing but condensed consciousness or consciousness that has been metamorphosized. Thought, Energy and Matter have the same relationship as Water vapor, Water and Ice. Everything you see around you including matter is the manifestation of the ONE father or supreme consciousness. It is the macrocosmic thought projection aka imagination of the ONE Creator's mind. Rather than attain happiness through Material worldly pleasures which are merely crudified versions of the ONE reality, why not attain happiness directly from the SOURCE of all creation? That is the only way anybody in this world can attain LASTING happiness. Because of who we are as Americans, we pushed the *External frontiers* of this continent and became one of the greatest nations on earth. But to attain the purpose of life and the ultimate goal, we must push the *Internal frontiers* and go within for that is the only way to become one with THE REAL SELF within us and know what truth is through direct experience! According to the Law of One the fastest way to become ONE with the Father is through the process of Self Realization which is attained through the ancient science of "Union based" Meditation as well as service to humanity. "Union Based" Meditation is meditation for the purpose of having Union aka becoming ONE with the Creator or absolute truth through direct experience. It is the Origin of all True world religions where the founders had direct inner experience of the ONE all pervading consciousness that permeates and sustains us. Unfortunately, religions today have lost the scientific practices that make you ONE with the Source of all creation and have turned into rigid dogmatic belief systems. "Union Based" Meditation expand the mind and heart up into the ONE universal all-pervading all loving consciousness aka the Divine Father. It opens up the Intuitional layers of the mind in such a way

that we can attune to the creator and eventually become One with him through direct experience within. We can compare “Union Based” meditation to rigid narrow dogmatic belief systems in terms of the Redpill vs Bluepill analogy from the matrix. One awakens you to your REAL SELF and the true nature of reality which is ONENESS...whereas the other does not. It is the difference between eating and enjoying the fruit vs reading theories about the fruit...By Implementing the law of one on an individual level, we start developing compassion, empathy and love for everyone around us, because we realize that everything and everyone is interconnected and the *one manifestation* of the creator, and the creator is unconditional love and bliss. Just like when we dream, we see different people and environments in it, but when we wake up we realize it was all part of our ONE consciousness! The same way we will realize one by one that we are ALL part of the ONE consciousness of the Divine Father and that he is OUR true self!! When we help and love others we are helping and loving ourselves first and when we harm and hate others we harm and hate ourselves first for we are all part of the one consciousness that manifests into the current reality we see around us. This is how we fight the Darkside and the forces of darkness that are engulfing our nation...through direct inner experience of truth and the true nature of reality. Through the ripple effect of our own individual experiences, we will have an impact on a national level and thus bring back the light to this nation!
